About The Presenters

In 1996 **Independence Group Australia** was created to help individuals grow their wealth through investing whilst educating them on the theory of investments.

As a further service Independence Group Australia has offered individual coaching to their clients, and through this, many clients have become owners of several significant investment portfolios. Many of these individual investments, because of their features, have on average, out-performed the relevant market in producing capital growth.

Since 1996 Independence Group Australia has been involved with our clients in the purchase, management and ongoing support for over \$500 million of investments. During this period Independence Group Australia has developed expertise in delivering to our clients several types of investment vehicles, enabling our clients to invest in a broad spectrum of asset classes for both growth and income. Independence Group Australia has also developed educational courses such as Success Coaching for both individuals and corporate clients.

Independence Group Australia has a high commitment to customer service and through **I-Group Corporate Training™** has evolved from one man's belief in the power of self-improvement to a performance-based training company.

Profile - Your Speakers
